Profile

I am an independent Full Stack developer and systems administrator, experienced in creating and maintaining web applications and cloud services deployed by myself or on third-party platforms.

I specialize in developing custom solutions for small and medium-sized businesses, using modern technologies and industry best practices.

Education

TNS Duoc UC - San Bernardo Campus, Computer Programming Analyst San Bernardo, Chile
 • Thesis Portfolio: TurnoMaster Project Mar 2022 – June 2025
 • Shift management system for SMEs in SaaS format. Final grade 7.0

Experience

LastDon Internship Center, Full Stack Developer / Project Director Remote
 • Led a team of 5-8 developers in building a web platform for inventory and sales management for a local company. Dec 2024 – Feb 2025
 • Developed a decoupled monolith project with React frontend and Laravel backend, implementing a MySQL database. 3 months
 • Deployed the application on a Hostinger server, managing server configuration, database creation, and ensuring proper project implementation.
 • Provided guidance to team members on using Git, GitHub, working with branches, repositories, and Pull Requests. Explained PHP and Node.js dependency installation, development environment setup, coding best practices, and teamwork.
 • Contributed to the creation of technical documentation and user manuals to facilitate platform adoption and use by end users.
 • Implemented and managed a Discord server for the team, improving communication and collaboration compared to Google Meet limitations.

Projects

Reyes&Friends Online
 Web development and IT services platform. Jan 2025

- Implementation of a decoupled monolith with React and TailwindCSS as frontend and Flask as backend.
- Deployment on personal VPS servers with custom configuration.
- Domain and SSL certificate management.
- Security filters and forms protected with Cloudflare Turnstile and reCAPTCHA.
- Responsive design and SEO optimization.

ReyesHosting Online
 Hosting platform for video games like Minecraft, with a custom admin panel. Jan 2026

- Development of an E-commerce system with Laravel, TailwindCSS, and Livewire.
- Integration of payment gateways such as Webpay and Stripe.
- Automated deployment of game servers on VPS using custom scripts.
- User, plan, and billing management.
- Implementation of technical support via tickets and live chat.
- Performance optimization and system scalability.
- Design of an intuitive and attractive user interface.
- Implementation of security measures to protect user data and transactions.
- Continuous maintenance and updates to ensure optimal system operation.

Certificates_and_Awards

- SOFTWARE ARCHITECTURE - Duoc UC (2025)
- DATA MODEL ANALYSIS AND DEVELOPMENT - Duoc UC (2025)
- SOFTWARE PROGRAMMING - Duoc UC (2025)
- SOFTWARE QUALITY - Duoc UC (2025)
- ANALYSIS AND PLANNING OF IT REQUIREMENTS - Duoc UC (2025)
- INTERMEDIATE ENGLISH INTERNATIONAL - Duoc UC (2025)
- Basic Principles of Internet of Things - Sence (2025)
- Programming with JavaScript - Sence (2025)

Skills_and_Competencies

Programming Languages and Scripts: Python, PHP, HTML, CSS, JavaScript, TypeScript, SQL, Bash, Dockerfile, Yaml, JSON, CSV, Markdown, Arduino

Frameworks and Libraries: React, Laravel, Flask, Django, TailwindCSS, Livewire, Bootstrap, Vue.js, Node.js, FastAPI

Infrastructure and Tools: Apache, Nginx, Linux (Ubuntu, Debian, RHEL, Arch), VPS, Cloudflare, SSL, DNS, Git, GitHub, CI/CD, RESTful APIs, Docker, Virtualization, Bash Scripting, System Administration, Reverse Proxy, Web Security, SEO

Databases: MySQL, MariaDB, SQLite, Oracle Database, Cassandra, MongoDB

Platform Implementation: AWS S3, Hostinger, WebPay, Stripe

Networks and Security: Fortinet, Fortigate, Firewalls, VPN
